

Dear Sir/Madam,

I am a financial supporter of the Air 1 Radio Network out of Rocklin, CA. I receive Air 1's signal in Jacksonville, FL on the FM station 89.5. Air 1 has been a blessing to me, my kids and to many of my friends (whom I have introduced to this station are they are now supporters). Air 1 provides an alternate Christian music format that is more appealing to the young people in our area. Without this station, many of our youth in Jacksonville would be listening to music about disrespecting men, women, children and our authority figures. Since Air 1 has become available to us here in Jacksonville, our young people are now listening to music that has that edgy, contemporary sound kids desire while maintaining a positive, uplifting message. Now, isn't that what we really want for our kids anyway? for them to choose on their own, a music format that encourages instead of tearing down?

Air 1 had changed our lives for the better. My kids and I listen to the same music since Air 1 provides a positive alternate that we can all appreciate. Listening together encourages family time, discussion and reduces opportunities for conflict over what we are going to listen to and when. I never hear objectionable material on Air 1.

I firmly believe it would be a detriment to my family, my friends' families and to the community of Jacksonville as a whole if Air 1 were replaced by Low Power FM service in our area. Please reconsider this issue and rule in favor of NOT allowing the introduction of the new broadcast servicer known as LPFM.

Thanx,
CJ Wright, Parent, Christian, Realtor
